Other than the classroom and laboratory learning, following are the suggested student-related **co-curricular** activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should perform following activities in group (max.3-4 students) and prepare reports for each activity. They should also collect/record physical evidences for their (student's) portfolio which may be useful for their placement interviews.

- a) Undertake a market survey of different Switches and cables.
- b) Conduct Mock drill of Electric shock and respiration.
- c) Arrange group discussion on
- d) Seminar/Presentation on following topics:
  - i. Electrical I.E. Safety rules.
  - ii. Electrical Protective devices.
  - iii. Electrical tools

- iv. Different types of wires and cables.
- v. Different types of earthing etc.

### 11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

- a) Massive open online courses (**MOOCs**) may be used to teach various topics/sub topics.
- b) Guide student(s) in undertaking micro-projects.
- c) '**L**' in **section No. 4** means different types of teaching methods that are to be employed by teachers to develop the outcomes.
- d) About **20% of the topics/sub-topics** which are relatively simpler or descriptive in nature is to be given to the students for **self-learning**, but to be assessed using different assessment methods.
- e) With respect to **section No.10**, teachers need to ensure to create opportunities and provisions for **co-curricular activities**.
- f) Introduce E-waste recycling technology among the students.
- g) Guide students for reading data sheets.

### 12. SUGGESTED MICRO-PROJECTS :

**Only one micro-project** is planned to be undertaken by a student that needs to be assigned to him/her in the beginning of the semester. In the first four semesters, the micro-projects are group-based (group of 3 to 4). However, **in the fifth and sixth semesters**, the number of students in the group should **not exceed three**.

The micro-project could be industry application based, internet-based, workshop-based, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of PrOs, UOs and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission.. The students ought to submit micro-project by the end of the semester to develop the industry-oriented COs.

A suggestive list of micro-projects is given here. This has to match the competency and the COs. Similar micro-projects could be added by the concerned course teacher:

- 1) Prepare Extension board using few sockets and switches.
- 2) Prepare a board of different types of wires or cables.
- 3) Prepare a board of different types of Switches and sockets.
- 4) Make a PCB circuit using electronic components.
- 5) Prepare a board of different types of lugs and glands.
- 6) Prepare board of different protective devices with specification.
- 7) Make a simple control circuit using contactor and push button.
