FORMAT FOR ASSIGNMENTS		
Course Name (With Code): Web Development using PHP		
Semester / Year: FIRST/FIRST		
Assignment Number: 4th		
Assignment CO Number:		
Sr. No.	Questions related to Course Outcomes	
1	Explain the different modes available for opening files in PHP and what they are used for. Include examples of when you might use each mode.	
2	Describe the functions available in PHP for working with directories. How do you use them to create, open, list, and delete directories?	
3	Compare and contrast the GET and POST methods for submitting form data in PHP. What are the advantages and disadvantages of each?	
4	What are the common security considerations when handling file uploads in PHP? How can you mitigate risks?	
5	Discuss the differences between sending plain text emails, HTML emails, and emails with attachments in PHP. What headers and methods are used for each?	
6	Write a PHP script to create a file named data.txt, write some content to it, and then read and display the content	
7	Write a PHP script to handle file uploads and save the uploaded file to a directory named uploads.	
8	Create a PHP script that processes form data submitted via the POST method and displays the submitted values.	
9	Write a PHP script to validate a name using preg_match() and an email address using filter_var().	
10	Write a PHP script to send an HTML email with the subject "Welcome" and a message that includes a greeting and a link.
